

January 27, 2020

Air Greenland and Canadian North share a common purpose – to bridge vast distances of our Arctic homeland and connect our customers to the people, places and things that matter the most, while supporting economic growth in the communities we proudly serve.

With this in mind, we believe that there is enormous potential for us to facilitate trade, encourage tourism and support cultural connectivity by working together to forge new connections between Greenland and North America.

The undersign representatives of Air Greenland and Canadian North hereby commit to further investigate partnership opportunities for air service development and sustainable tourism between Greenland and North America.

This letter of intent demonstrates our common goal to improve connectivity to, from and throughout the Arctic and beyond.
